CENTRE-BASED EARLY CHILDHOOD SERVICES

The Centre is an approved Early Childhood Services (ECS) provider through Alberta Education

Are you looking for a program with a science-backed approach to get your child ready for school?

The Centre for Autism Services offers an onsite program for children aged 2 years 8 months – 5 years 11 months (as of Sept. 1 of application year).

We know that providing high-quality daily support early in life can dramatically improve a child's ability to learn and succeed in school. We offer a program that is based on the best available evidence. With small class sizes and high teacher-to-student ratios, student learning is maximized.

INCLUDED WITH ONSITE PROGRAMMING:

- **3 focused learning hours, Monday through Thursday**
- **Certified teachers**
- **Highly trained educational assistants**
- **Daily access to SLP and OT**
- **Coordinated support for home and school-based services (where applicable)**

HOW IT WORKS

- We use a naturalistic developmental behavioural approach proven to be effective for children with ASD
- Class time is a mix of play and structured activities
- These activities focus on typical developmental milestones and are taught with evidence-based principles
- Daily information is collected to show evidence of a child's learning
- Children move through goals at their own pace
- Play-based routines are filled with learning experiences in academics, communication, socialization, motor skills, and self-help skills
- Strong emphasis on increasing independence and maximizing school readiness
