

# Do you Identify as an Autistic Adult or a Caregiver of an Autistic Individual?

We are looking for: 1) **autistic adults** and 2) **parents/caregivers** to take part in an anonymous survey sharing your **experiences and/or opinions about speech and language supports for autistic children and youth**. Participants completing the survey must currently reside in Canada and be over the age of 18 years.

In partnership with autistic committee members, caregivers, and community clinicians, researchers at Western University welcome self-identified autistic individuals and their parents/caregivers to inform best practices for speech-language pathology services.

We aim to integrate knowledge from a broad range of perspectives into the development of a guidance resource for Speech-Language Pathologists.

If you agree to participate, you will be asked to complete an **anonymous online survey (15-30 minutes)**.

**Participants will have the opportunity to be compensated for their participation.**

***Note:** A formal diagnosis of Autism is not required to participate in this survey.*

*We welcome all individuals who identify as autistic or identify their family members as autistic to share their lived experiences.*

Please use the QR code or copy and paste the link below into your browser to access the letter of information and link to our survey.
